

First 53

681.400 €*

Hull length: 15,98 m

Beam: 5 m

Year: 2025

Description:

Heir to more than 40 years of experience of the First range launched by Bénéteau in 1977, the First 53 sets the course for effective cruising.

It is the first "Luxury Performance" unit designed for demanding shipowners and experienced sailing experts. Wheel fairing and balance for unique sensations, fluid deck plane, marine and modern interior on a background of white lacquered bulkheads and molded wood: with the First 53, the new First generation is underway!

Exterior design:

Lucky combination of lines that are both classic and modern marked by a thin straight bow, but with volume to the bow, and a very late half 5 m beam, the First 53 immediately shows a vigorous sailing boat character. The bathtub has been particularly studied so that nothing hinders the circulation towards the bow: maneuvers near the double steering post, with easy access to the passages, space entirely conditioned to rest near the descent. The not very prominent dressing room, gives a classy style, the flush cover, a modern look. With the powerful but perfectly dominable sail plane with reduced crew, a mast and a high-end sailmen, the First 53 marks a new era.

Interior design:

It is the great return of molded wood, noble material with clean finishes, on a background of lacquered bulkheads and teak floor for the interior space of the First 53 that does not look too extreme in its modernity. Gifts and handrails, complete stowages make up the interior equipped with three double cabins and two toilets. The major innovation of this interior lies in the living room / rest corner, equipped with a sofa with low table, separated from the kitchen space equipped with a table for dinner. The set is bright, airy and communicates easily with the outside by an easy and intuitive descent.
